

2012

FARM DRAINAGE & NUTRIENT MANAGEMENT FIELD DAY

Hosted by Michigan Land Improvement Contractors Association & Michigan State University Extension

August 1 & 2

Located at Pleasant View Dairy
5211 W. Chicago Rd.
Jonesville, MI 49250

Promoting Soil, Water and Nutrient Management Advancements in Agriculture

Trade show events run 9 am to 4 pm both days

Lunch can be purchased on site.

Field demonstrations will run continuously
with a short break over the noon hour.

Field Demonstrations will include:

- **Drainage system design & installation**
- **Drainage tile smoke demonstration**
- **Water control structures & controlled drainage**
- **Tillage for residue management and manure applications**

Educational sessions each day at 10:30 and 1:15.

Join these fast paced sessions to hear how these systems work
on local farms along with specialists from surrounding states:

- **Cover crops & nutrient recycling of manure**
- **Manure calibration**
- **Multipurpose drainage systems:
Farmer experience in sub irrigation,
recycling of livestock wash water and more.**

4 CCA credits: 2 SW, 2 NM

The *Michigan Land Improvement Contractors Association* and *Michigan State University Extension* will be demonstrating the latest advancements in Nutrient Management and Agricultural Drainage.

Exhibitors will be on hand displaying equipment and supplies relating to the drainage and excavating industry, as well as livestock and crop production.
